

Here's just some of the benefits of switching to Eco Balls: -

-  **One set of Eco Balls lasts for 1,000 washes** - how much will your current washing powder cost you for this amount?
-  **Softens clothes without needing fabric conditioner** - how much will this alone save you? Eco-Balls even soften clothes in hard water areas.
-  **Lower wash temperatures** - EcoBalls operate on a quick wash (30 degrees), reducing your electricity costs and water bills (if you're on a water meter), and saving you even more money.
-  **Shorter wash time** - because Eco Balls operate on a quick wash, your washing time is also dramatically reduced, allowing you to spend much less of your time doing this chore.
-  **Hypoallergenic** - so suitable for sensitive skins/eczema (including babies and children).
-  **Environmentally friendly** - No harsh chemicals or plastic containers to dispose of, meaning much less pollution.
-  **Antibacterial** - Kills Escherichia Coli and Staphylococcus Aureus.
-  **Kind to your clothes** - They won't fade bright colours or damage clothing fibres.

Eco Balls now have an ever-growing band of dedicated users. We're confident that once you've tried them, you'll NEVER go back to regular washing powders. In fact, we're so confident that we're willing to offer a very special guarantee (read on for full details):-

Here's just a few of the comments from Eco Balls users:-

-  *"I've been using these for a couple of years now, and am still absolutely amazed at this product. They wash brilliantly without loading your clothes with nasty bleaching detergents; my dark/coloured clothes don't fade, and towels do what they're supposed to do - which is dry you! The added benefit (which is uncommon with eco-friendly products) is that they're also extremely cost efficient!"*
-  *"I have now been using these brilliant ecoballs for about 6 months, and am totally sold on them! Clothes are clean, colours are bright, and the laundry just smells clean - not of nasty synthetics. The laundry dries quicker and seems easier to iron. In addition to the saving I make of washing powders and conditioner, I also save on machine time. I can cut out the rinse cycles, and save about an hour a wash!"*
-  *"I have just received my Eco-Balls and I have done only 3 wash loads but they have already had to contend with my 1yr old daughters nappy wraps and her and her sisters feeding habits...which aren't good....Blackcurrent, Chillie and much more. So far I am really pleased*

with the product and look forward to the savings they will make me."

"Used eco balls for over a year. I run and and play sport regularly at university and they remove all mud from cross country races, rugby. Cannot fault them as an easy way to wash."

" Old Nylon Underwear that was turning grey seemed to brighten and become whiter, towels were soft with out the need for softener, and all my clothes smelt fresh. There is not that strong over powering smell of detergent either. And my daughters ecsema seemed to get better after i started using them."

"I must say...I am so very impressed with the results of the wash. The washing comes out so clean and fresh and I have saved up all my dirty washing for the Eco Balls.... I have used a fabric conditioner, but you dont have too...as the clothes are very soft...its just that I like a fragrance to the wash. So come on....if you are thinking of buying them dont hesitate...they are really fantastic and save so much money. I have two children ages 16 and 12 a boy and girl ...so I know what dirty washing can be....and these get the job done!! No wonder the supermarkets dont stock them...no one would buy anything else ever if they got these."

"I am a new convert to Eco Balls and will never go back! The washing is softer, fresher and faster (no need to rinse for several cycles). Its cheaper, cleaner and will never irritate your skin or nose."

"THANK YOU SO MUCH - these balls are top bananas! Brilliant. It feels great to use them and not to be giving my money to those big pharmaceutical companies. They wash so well and I really like the fresh smell. Just wanted to say a big thank you, I'm sure someone there had a long hard time and a lot of vision to get this off the ground - you deserve some major recognition and much appreciation for all your hard work folks. Thanks again for making these balls a reality. "
