

TIRED OF INAPPROPRIATELY BEHAVING TIES?

Here's your solution to an unruly tie!

This necktie restraint will help eliminate those behaviors.

The Tie Thing™ is an alternative to traditional necktie restraints such as tie tacks, clips, or bars.

The Tie Thing™ controls a necktie without puncturing or snagging, and it does not show. Wear this tie accessory one time and you'll find out what others have discovered -- where has The Tie Thing™ been all this time?

So what exactly is an inappropriately behaving tie?

Below are some examples to illustrate this common problem.

EXAMPLES OF INAPPROPRIATE TIE BEHAVIOR

FLIER

On a windy day, this tie can really get in the way.

DUNKER

Lunch is going great until your tie falls on your plate.

TUCKER

Yes, you might avoid a mess, but you certainly won't look your best.

DRIFTER

If you want to look great, then your tie should be straight.

In combating these inappropriate behaviors, necktie wearers have developed all sorts of accessories to help their tie stay in place: the tie pin, tie bar, tie clasp, tie tack, and tie chain. In desperation some have resorted to using pins, paper clips, or even tape to strap their tie in place! The Tie Thing™ eliminates the need for such barbaric devices. It will restrain your tie without the possibility of ruining it. Why? The Tie Thing™ men's necktie restraint acts like a tie tack, clip, or bar, but it is fabric!

So how does The Tie Thing™ work?

Read our step-by-step instructions below to make this tie accessory part of your "getting dressed" routine. It will keep you looking neat, professional, and in control.

THE TIE THING™ TECHNOLOGY **PATENTED DESIGN**

MACHINE WASHABLE FABRIC • WILL NOT DAMAGE TIE OR SHIRT

- 1 Put on your tie.
- 2 Slide THE TIE THING™ through the loop label on the back of your tie.
- 3 Button THE TIE THING™ to the coordinating buttons on your shirt.
