

**iGrill communicates with your iPhone, iPad or iPod Touch via a secure and long range Bluetooth® connection. Explore the revolutionary features that make iGrill the future of cooking and grilling!**

#### **iGrill Device Features:**

iPhone, iPad, iPod Touch compatible  
Whatever your Apple device, you're cooking with us!

Touch Interface and Projection Display  
iGrill is easy to keep clean because there are no buttons to get gummed up or seams to gather dirt.

Bluetooth® enabled  
Kitchens are cluttered enough. Who needs wires?

60 m (200 foot+) range  
Anywhere in the house, anywhere in the yard, we have you covered.

Stand-alone thermometer  
iGrill works whether you pair it with your device or not. Just set your desired temperature and iGrill will beep when your food is ready.

Maximized Temperature Range  
Capable of tracking temperatures up to 204°C (400°F).

Multi-Probe capacity  
When you purchase a second Probe, iGrill can monitor the temperature of two items simultaneously, like turkey and ham or the breast and the drumstick.

Integrated probe storage  
Eliminate the tangle in your kitchen drawer!

Alarms  
On the grill, out of mind. So you can pay attention to your guests!

Lay it flat, stand it up, or hang it.  
Quick to set up, out of the way and easy to read.

## iGrill App Features:

iGrill Device connect-ability  
Catering to your technological tastes.

Food temperature option  
As much for the safety reasons as the savory ones.

Multiple-probe support  
Because everyone likes his or her steaks cooked differently.

Cooking time remaining feature  
Know when to start the vegetables, set the table or round up the kids.

### Additional Features:

Multiple view options  
You're the chef. See it how you envision it.

Standard recipes  
Mouth-watering choices never farther away than your fingertips!

Kitchen timer  
Because when you're cooking, timing's everything.
